

Project	Voyager of the Seas		Code	0011051206E
Venue	Kawneer Massa Yards Finland	Type	Decoration	
By	In house designer´s team	From	AFO	
Details	To line the inner walls of the panoramic lifts in this cruise liner the marine architects commissioned Advanced to design a series of animated panels depicting underwater scenes of marine life. The water, fish, algae and bubbles are animated with movement and slow color changes. Each panel, measuring 3 x 2m and curved to the inner shape of the lift shaft was produced at Advanced´s Barcelona workshops.			

Materials	360,000m HBF 201, 0,5mm high performance bare fiber. 96 AHI illuminators with custom animation drums and 100W MR16 lamps.
